PROFILE

Senior software developer with 10+ years across game development, full stack web engineering, and cross-platform mobile apps, with hands-on work in Unity3D, Unreal Engine, and TypeScript. Focused on shipping products and building agentic AI systems, including globally used games, cognitive apps, and interactive experiences.

EXPERIENCE

Independent / Full Stack & Agentic Systems Developer

MAY 2026 - PRESENT, PHILIPPINES

TYPESCRIPT, NEXT.JS, CLOUDFLARE WORKERS, CLAUDE AI, CURSOR

- Built a full stack web games platform from the ground up, including Klondike Solitaire and Word Guess, with daily puzzle scheduling and shared domain logic across a monorepo.
- Designed a custom agentic orchestration system using Claude AI and Cursor for lifecycle management, intent parsing, and rule-governed execution.
- Deployed edge-compatible builds to Cloudflare Workers and structured reusable domain packages across a turborepo workspace.

Independent / Mobile Developer

FEB 2026 - PRESENT, PHILIPPINES

FLUTTER, DART, ANDROID, CURSOR

- Developed an Android application to replace physical smart TV remotes, including device discovery, remote control input mapping, and a custom touch-based UI optimized for one-handed use.

Sovrun(formerly BreederDAO) / Game Developer

AUG 2023 - JAN 2026, PHILIPPINES, HYBRID WORK

UNITY 3D, UNREAL ENGINE

- Built experimental games and simulation projects in an R&D-focused environment, including playable prototypes and end-to-end demos across blockchain integration, autonomous worlds, AI-driven simulations, and multiplayer systems.
- Collaborated with design, research, blockchain, and AI teams to validate technical feasibility and gameplay scalability.

Neeuro PTE LTD / Lead App Developer

OCT 2016 - JAN 2026, SINGAPORE, REMOTE WORK

UNITY 3D

- Led development of live mobile games and cognitive training apps built in Unity, including applications integrated with EEG/BCI hardware for real-time data-driven gameplay.
- Shipped Android and iOS products, managed performance optimization and platform-specific requirements, and collaborated with designers, researchers,

and backend teams in a startup environment.

WORKFLOW

- Jira
- Markdown
- Notion
- Trello

Virtual Labs / Senior Unreal Engine Developer

FEB 2022 - NOV 2022, PHILIPPINES, REMOTE WORK

UNREAL ENGINE

- Developed a multiplayer metaverse environment using Unreal Engine with real-time interactions, UI systems, user account features, and Pixel Streaming deployment to the web.
- Kept the focus on runtime interaction and delivery across PC and web builds.

CrazyShark / Lead Unity 3D Developer

MAY 2015 - OCT 2015, POLAND, REMOTE WORK

UNITY 3D

- Led mobile game projects from prototype to release in Unity 3D.

Cylindo (formerly LoveMyHome) / Junior Unity 3D Developer

AUG 2012 - AUG 2014, DENMARK, REMOTE WORK

UNITY 3D

- Developed 3D room planners and furniture customization tools, delivering interactive 3D solutions for Web and iOS platforms.

EDUCATION

De La Salle University - Manila / Bachelor's Degree

MAY 2006 - DEC 2011, MANILA, PHILIPPINES

Bachelor of Science - Computer Science

Specialized in Instructional Systems Technology
